Spray tan aftercare instructions

Caring for your spray tan

Your technician will tell you how long to wait before your first rinse. These are the salon's general steps.

- Wear loose, dark clothing until your first rinse.
- Rinse with lukewarm water only the first time, no soap, and pat dry.
- For the first day, skip sweating, swimming and long hot showers.
- Moisturize every day after that to help the color fade evenly.
- A spray tan isn't sun protection. Use sunscreen outdoors.

If your skin reacts

Itching, a rash or swelling: rinse with plain water, check with your doctor, and let the salon know.
